# Presentation

---

**Moderator:** Thank you very much for your patience. TIS Inc. will now hold a financial results meeting for the fiscal year ended March 31, 2025. First, let me introduce today's two presenters.

The first is Yasushi Okamoto, President and Representative Director, on your left as you face us. Next, there is Masakazu Kawamura, Managing Executive Officer and Division Manager of Corporate Planning SBU.

We will then give a brief overview of today's proceedings. First, Kawamura and Okamoto from our company will give an explanation in that order, followed by a Q&A session with everyone. This briefing is scheduled to last one hour, including Q&A. The materials are available on our website, the top page of our IR site, and our latest IR events. Please refer to it when you have time.

A video of the briefing will be available on our website at a later date.

Kawamura will now give an overview of our business performance for the fiscal year ended March 31, 2025, the outlook for the fiscal year ending March 31, 2026, and shareholder returns. Please go ahead.

**Kawamura:** This is Kawamura from TIS. Thank you for your cooperation. Let me begin by explaining the summary of financial results for the fiscal year ended March 31, 2025, the outlook for the fiscal year ending March 31, 2026, and shareholder returns, which were announced at 3:30 PM today.

## Highlights

### Fiscal 2025: Financial Highlights

- Despite impact of decline in number of large development projects from peak, sales and income increased year on year. Results exceeded estimates.
- Operating margin rose 0.3 percentage points to 12.1%.
- Orders received and order backlog build up strongly.

### Fiscal 2026: Performance Forecast

- Despite continuing growth investment, including investment in human resources, projections are for higher sales and higher income, with an operating income margin of 12.5%.

### Return to Shareholders

- ¥2 year-end dividend increase (annual dividend of ¥70 per share) in Fiscal 2025, in line with business growth exceeding estimates.
- For Fiscal 2026, we plan to pay an annual dividend of ¥76 per share, up ¥6. In addition to ordinary return to shareholders, aiming to improve capital efficiency, the company decided to repurchase treasury stock at a total cost of ¥42 billion.

© 2025 TIS Inc.

■ 2

Please see page two. Here are the highlights of the current financial results.

First, for the fiscal year ended March 31, 2025, we have exceeded our plan with YoY increases in both revenue and profit, despite the peak-out impact of large-scale projects. The operating margin improved by 0.3 percentage points from the previous fiscal year to 12.1%. In addition, both orders and order backlogs increased from the previous fiscal year and accumulated steadily.

Next, for the fiscal year ending March 31, 2026, we plan to increase sales and profits and achieve an operating margin of 12.5%, even as we continue to invest in growth, including investments in human resources.

Finally, I would like to discuss shareholder returns. In line with business growth exceeding the plan for the fiscal year ended March 31, 2025, we increased the year-end dividend by JPY2, bringing the annual dividend per share to JPY70. The annual dividend per share for the fiscal year ending March 31, 2026 is planned to increase by JPY6 to JPY76. In addition to regular shareholder returns, the Company has decided to repurchase a total of JPY42 billion of its own shares to improve capital efficiency.

## Fiscal 2025: Performance Highlights (YOY change)

- Despite impact of decline in number of large development projects from the peak, sales and income increased, supported by contribution from business expansion by responding accurately to clients' IT investment demand, including digital transformation, and by promoting the provision of services.

[Millions of yen]	Fiscal 2024	Fiscal 2025	YoY change	
Net Sales	549,004	571,687	+22,682	[+4.1%]
Operating Income	64,568	69,047	+4,479	[+6.9%]
Operating Margin	11.8%	12.1%	+0.3P	-
Net Income Attributable to Owners of the Parent Company	48,873	50,012	+1,138	[+2.3%]
Net Income to Net Sales Ratio	8.9%	8.7%	-0.2P	-
Net Income per Share [Yen]	203.28	215.00	+11.72	[+5.8%]
ROE	16.0%	15.3%	-0.7P	-

• Non-operating income: ¥2,620 million (YOY change -¥2,392 million)  
→ Equity in earnings of affiliates ¥833 million  
Dividend income ¥775 million, etc.

• Non-operating expenses: ¥1,164 million (YOY change +¥137 million)  
→ Interest expenses ¥495 million, etc.

• Extraordinary income: ¥9,570 million (YOY change +¥6,278 million)  
→ Gain on sale of investment securities ¥8,558 million, etc.

• Extraordinary loss: ¥5,926 million (YOY change +¥3,274 million)  
→ Impairment loss ¥4,242 million  
Loss on valuation of shares in subsidiaries ¥827 million, etc.

© 2025 TIS Inc.

\* The impact on consolidated results following the consolidation in previous fiscal year was ¥2.9 billion on sales and ¥90 million in operating income, after amortization of goodwill.

5

Please refer to page five. This is a summary of our financial results for the fiscal year ended March 31, 2025.

Despite the peak-out effects of large-scale development projects, overall, the Company was able to achieve increases in both sales and income by promoting business expansion. Net sales increased 4.1% from the previous year to JPY571.6 billion, operating income increased 6.9% to JPY69 billion, and the operating margin rose 0.3 percentage points to 12.1%.

Net income attributable to shareholders of the parent company increased 2.3% from the previous year to JPY50 billion. The Company recorded a gain on sales of investment securities as a major extraordinary gain, while an impairment loss on goodwill and other assets of a subsidiary was recorded as a major extraordinary loss.

ROE declined slightly, but remained high at 15.3%.

## Fiscal 2025: Performance Highlights (Compared with estimate)

- All items settled above estimate.

[Millions of yen]	Fiscal 2025 Estimate	Fiscal 2025 Actual	Compared with estimate	
Net Sales	555,000	<b>571,687</b>	+16,687	[+3.0%]
Operating Income	66,500	<b>69,047</b>	+2,547	[+3.8%]
Operating Margin	12.0%	<b>12.1%</b>	+0.1P	-
Net Income Attributable to Owners of the Parent Company	44,800	<b>50,012</b>	+5,212	[+11.6%]
Net Income to Net Sales Ratio	8.1%	<b>8.7%</b>	+0.6P	-
Net Income per Share [Yen]	192.55	<b>215.00</b>	+22.45	[+11.7%]
ROE	13.9%	<b>15.3%</b>	+1.4P	-

Next, page six shows the planned ratio.

The Company was able to firmly capture IT investment demand from a wide range of customers, and all items exceeded the plan. Net income was much higher than planned due to extraordinary gains and other factors, and the company was able to achieve an increase in income compared to the plan for a decrease in income.

## Fiscal 2025:

### Analysis of Changes in Operating Income by Factors (YOY change)

- Despite impact of decline in number of large projects from the peak and impact of unprofitable projects, gross profit margin improved and operating income increased.

7

Page seven shows changes in operating income by factor.

Despite the impact of the peak-out of large-scale development projects, the Company was able to achieve an increase in operating income, driven by an increase in income from higher revenues. The gross profit margin rose 0.4 percentage points from the previous year to 28%. Unprofitable projects totaled approximately JPY2.6 billion, a decrease of about JPY1.4 billion from the previous year.

In Q4, industrial IT projects amounted to JPY360 million, and the accumulation of small projects totaled JPY550 million.

## Fiscal 2025:

### Analysis of Changes in Operating Income by Factors (Compared with estimate)

8

Page eight shows the planned ratio.

The increase in income associated with higher-than-planned revenue was the driver of the strong landing of operating income. It is unfortunate that the gross profit margin fell short of the plan, but the main reason for this was the impact of unprofitable projects, as well as a decline in the sales mix due to an increase in sales projects.

## Fiscal 2025: Sales by Client Sector

- Overall, trends remained favorable. Decrease recorded by Credit card and Public institutions were mainly due to decrease in number of large projects from peak.

9

Please refer to page nine. This is sales by client industry.

Unchanged from the trend during the period, the overall favorable trend continued, except for cards and public, which were negatively impacted by the peak-out effect of large projects. Among them, services and assembly-type manufacturing led the overall performance.

## Fiscal 2025:

### Sales and Income by Key Business Segments (YOY change)

[Millions of yen]		Fiscal 2024	Fiscal 2025	YOY change		Overview
Offering Service Business	Net Sales	130,759	145,515	+14,755	[+11.3%]	Higher sales and higher income, as higher IT investment demand in enterprise, platform, and payment settlement sectors offset impact from unprofitable projects. Overseas business also contributed.
	Operating Income	7,659	9,937	+2,277	[+29.7%]	
	Operating Margin	5.9%	6.8%	+0.9P	-	
Business Process Management	Net Sales	41,953	42,646	+693	[+1.7%]	Despite ongoing difficulties faced by some existing BPO services, sales and income grew, reflecting efforts to acquire projects in the DX Business and other areas as well as cost control measures.
	Operating Income	4,551	5,326	+775	[+17.0%]	
	Operating Margin	10.8%	12.5%	+1.7P	-	
Financial IT Business	Net Sales	106,304	100,252	-6,051	[-5.7%]	Sales and income declined, as large-scale projects for core clients in credit card sector as well as public-sector financial institutions fell from peak.
	Operating Income	15,185	12,321	-2,863	[-18.9%]	
	Operating Margin	14.3%	12.3%	-2.0P	-	
Industrial IT Business	Net Sales	121,896	128,120	+6,224	[+5.1%]	Sales and income grew, as wider IT investment across industries, including services, manufacturing and distribution, offset impact from reactionary drop in large development projects in manufacturing sector as well as unprofitable projects.
	Operating Income	18,287	19,330	+1,042	[+5.7%]	
	Operating Margin	15.0%	15.1%	+0.1P	-	
Regional IT Solutions	Net Sales	172,376	177,425	+5,049	[+2.9%]	Despite negative impact from reactionary drop in projects related to medical services, sales and income grew, reflecting widespread demand for IT investment, particularly among municipalities and life and non-life insurance companies, as well as a significant decrease in unprofitable projects.
	Operating Income	18,497	21,576	+3,078	[+16.6%]	
	Operating Margin	10.7%	12.2%	+1.5P	-	

© 2025 TIS Inc.

10

On page 10, we will explain the situation by major segment compared to the previous year.

Offering services posted higher revenues and profits due to solid IT investment demand in the area of enterprise infrastructure-based payments. Overseas business also contributed.

In BPM, although some existing BPO operations continued to face difficult conditions, the acquisition of DX business and other projects, as well as successful cost control, led to an increase in revenue and profit.

The decline in revenue and profit in financial IT was due to the peak-out effect of large projects for credit card-related core customers and public-sector financial institutions.

Industrial IT posted increases in both revenue and earnings due to expanded IT investments in a wide range of industries, including services and manufacturing, and distribution, despite the impact of a reactionary decline in large-scale development projects in the manufacturing sector and unprofitable projects.

In regional IT solutions, despite the impact of a reactionary decline in medical sales projects, revenue and earnings increased due to a wide range of IT investment demand, mainly from municipalities and life and non-life insurance companies, as well as a significant decrease in unprofitable projects.

## Fiscal 2025:

### Sales and Income by Key Business Segments (Compared with estimate)

[Millions of yen]		Fiscal 2025 Estimate	Fiscal 2025 Actual	Compared with estimate		Overview
Offering Service Business	Net Sales	140,800	145,515	+4,715	[+3.3%]	Despite impact from unprofitable projects, sales and income both reached. This was due to favorable performance by Nihon ICS and better-than anticipated demand for enterprise services. Overseas business also contributed.
	Operating Income	8,600	9,937	+1,337	[+15.6%]	
	Operating Margin	6.1%	6.8%	+0.7P	-	
Business Process Management	Net Sales	43,000	42,646	-353	[-0.8%]	Sales fell short of the target due to fewer-than-expected project wins in the DX business. However, profit met expectations thanks to effective cost control.
	Operating Income	4,500	5,326	+826	[+18.4%]	
	Operating Margin	10.5%	12.5%	+2.0P	-	
Financial IT Business	Net Sales	98,500	100,252	+1,752	[+1.8%]	Impact of decline in number of large development projects from peak was slightly smaller than anticipated, achieving both sales and income.
	Operating Income	12,000	12,321	+321	[+2.7%]	
	Operating Margin	12.2%	12.3%	+0.1P	-	
Industrial IT Business	Net Sales	125,500	128,120	+2,620	[+2.1%]	Demand from clients in service and distribution sectors better than anticipated, boosting sales to estimated level. But negative factors, notably, unprofitable projects, prevented income from reaching estimate.
	Operating Income	19,600	19,330	-269	[-1.4%]	
	Operating Margin	15.6%	15.1%	-0.5P	-	
Regional IT Solutions	Net Sales	171,000	177,425	+6,425	[+3.8%]	Demand from clients in the life and non-life insurance sectors, local government-related IT investment, and higher orders for sales projects in industrial sectors better than anticipated. Sales were higher than anticipated, but income was in line with estimate due to factors such as recognition of temporary expenses.
	Operating Income	21,500	21,576	+76	[+0.4%]	
	Operating Margin	12.6%	12.2%	-0.4P	-	

© 2025 TIS Inc.

11

Page 11 shows the status of each major segment compared to the plan.

Despite the impact of unprofitable projects, sales and profits of the offering service business exceeded the plan due to the strong performance of the Japan ICS and higher-than-expected demand for enterprise and infrastructure systems.

BPM slightly missed its sales target due to the impact of not winning as many projects in the DX business as expected at the beginning of the period, but operating income exceeded the plan due to tighter cost control and other factors.

Financial IT exceeded the plan because the impact of the peak-out of large projects was less than expected, while operating income in industrial IT did not meet the plan due to the impact of unprofitable projects.

In regional IT solutions, sales exceeded the plan due to higher-than-expected demand from life and non-life insurance customers, support for municipal standardization, and an increase in industrial sales projects. Although there were occasions when we felt that it would be difficult to achieve the operating income target due to one-time expenses, Q4 was strong, and we were able to achieve the target line.

## Fiscal 2025:

### Order Status (Orders received during fiscal year)

- Orders received were up year on year, driven by software development.
- In Financial IT Business, although there was a reactionary drop in large development projects, sales grew for Industrial IT Business and Offering Service Business.

[Millions of yen]		Fiscal 2024	Fiscal 2025	YOY change	
Orders received		552,940	577,091	+24,151	[+4.4%]
Software development		278,508	295,838	+17,330	[+6.2%]
<b>Key Business Segments</b>					
Offering Service Business	Orders received	123,518	136,740	+13,221	[+10.7%]
	Software development	47,799	53,632	+5,832	[+12.2%]
Business Process Management	Orders received	39,976	40,922	+945	[+2.4%]
	Software development	13,030	13,395	+365	[+2.8%]
Financial IT Business	Orders received	101,977	93,787	-8,190	[-8.0%]
	Software development	52,209	48,637	-3,571	[-6.8%]
Industrial IT Business	Orders received	120,253	133,659	+13,405	[+11.1%]
	Software development	79,248	92,404	+13,156	[+16.6%]
Regional IT Solutions	Orders received	167,214	171,983	+4,768	[+2.9%]
	Software development	86,221	87,768	+1,547	[+1.8%]

© 2025 TIS Inc.

14

Beginning on page 14 is an explanation of the status of orders.

First, overall orders received increased 4.4% from the previous fiscal year to JPY577 billion due to a buildup in software development. Financial IT decreased due to a reactionary decline from large-scale development projects and the partial termination of operation services, but industrial IT and offering services have been building up solidly.

## Fiscal 2025:

### Order Status (Order backlog at year-end)

- Despite lingering impact from peak decline in large development projects in Financial IT Business, overall there will be a steady increase, mainly in software development.

[Millions of yen]		Fiscal 2024	Fiscal 2025	YOY change	
Order backlog		188,044	197,590	+9,545	[+5.1%]
Software development		101,386	107,993	+6,607	[+6.5%]
<b>Key Business Segments</b>					
Offering Service Business	Order backlog	42,248	48,954	+6,705	[+15.9%]
	Software development	16,152	18,383	+2,231	[+13.8%]
Business Process Management	Order backlog	7,543	7,943	+400	[+5.3%]
	Software development	7,259	7,526	+266	[+3.7%]
Financial IT Business	Order backlog	45,954	40,822	-5,131	[-11.2%]
	Software development	24,739	21,433	-3,305	[-13.4%]
Industrial IT Business	Order backlog	37,009	43,033	+6,024	[+16.3%]
	Software development	23,065	29,427	+6,361	[+27.6%]
Regional IT Solutions	Order backlog	55,289	56,835	+1,546	[+2.8%]
	Software development	30,169	31,222	+1,053	[+3.5%]

© 2025 TIS Inc.

15

Page 15 shows the order backlog at the end of the fiscal year.

The order backlog also increased 5.1% from the previous fiscal year to JPY197.5 billion, driven by software development. Generally, the trend of orders received remained unchanged, with solid accumulation in all segments except financial IT.

## Reference: Fiscal 2025 Fourth Quarter (Jan-Mar):

### Order Status (Orders received during the fourth quarter)

[Millions of yen]		Fiscal 2024 Q4	Fiscal 2025 Q4	YOY change	
Orders received		188,389	194,217	+5,828	[+3.1%]
Software development		84,619	87,705	+3,086	[+3.6%]
<b>Key Business Segments</b>					
Offering Service Business	Orders received	45,375	50,523	+5,147	[+11.3%]
	Software development	13,210	16,156	+2,946	[+22.3%]
Business Process Management	Orders received	11,032	11,150	+117	[+1.1%]
	Software development	4,105	3,967	-138	[-3.4%]

Free cash flow	29,761	46,006	+16,245	
Cash flow from financing activities	-21,889	-27,791	-5,902	Net increase (decrease) in borrowings and bonds -22,345 Purchase of treasury shares +26,720
Cash and cash equivalents at the end of the term	102,722	121,288	+18,566	

© 2025 TIS Inc.

\* Interest-bearing debt does not include lease obligations.

17

Page 17 shows the balance sheet and cash flows.

During the period under review, the equity ratio improved to 61.5%, reflecting stable profit generation. The absence of significant investment activity in the period under review has also contributed to an increase in free cash flow to a level similar to that of previous years, enhancing the Company's financial soundness. This was an explanation of the results for the fiscal year ended March 31, 2025.

## Fiscal 2025: Understanding the Business Environment

- Prospects for long-term expansion in IT investment continue. Attention should be paid to environmental changes.

		To date	From now
<b>Offering Service Business</b>	<ul style="list-style-type: none"> <li>Continued growth in cashless market. Policy, DX and inbound tourists will strengthen their tailwinds.</li> <li>Variety of themes and services through efforts by financial x operating companies (BaaS, Smart City Digital Accounts, etc.).</li> <li>Continued growth in cloud and security markets due to increase and sophistication of cyber-attacks and diversification of work styles. Active accounting and business management domains.</li> <li>The ASEAN economy continued to grow, supported by firm domestic demand, despite political instability.</li> </ul>		
<b>Business Process Management</b>	<ul style="list-style-type: none"> <li>Due to factors such as insufficient human resources and rising wages, there is an urgent need for enterprises to shift to value-added operations, and the growth outlook for the BPO market remains unchanged.</li> <li>Simple outsourcing, which depends on labor, is in a shrinking equilibrium due to progress in digitization, and downward pressure on prices intensifies.</li> <li>Preferences are given to consulting services and AI services that use data to help clients transform their businesses, grow them, and enhance their competitiveness.</li> </ul>		
<b>Financial IT Business</b>	<ul style="list-style-type: none"> <li>Financial markets revitalized against backdrop of upward movement in policy interest rates. The outlook remains unchanged for IT investment to strengthen competitiveness.</li> <li>Growth and expansion in code settlements intensified competition to lower commission rates, causing card operators to search for new business models.</li> <li>Along with the growth in the cashless market, competition with emerging players intensified, particularly in the company's own economic zone, and moves to reorganize.</li> <li>Individually, large-scale development projects have continued to decline from their peak, but opportunities for modernization demand, particularly in the leasing industry, increased.</li> </ul>		
<b>Industrial IT Business</b>	<ul style="list-style-type: none"> <li>The impact of soaring crude oil prices, exchange rate fluctuations, and pressure on wages and prices, etc. should be monitored closely, particularly in manufacturing.</li> <li>Demand for modernization and ERP renewals was firm.</li> <li>Performance was strong in restaurants and services, but personnel shortages were severe despite resurgence. Focus on balance between IT investment and allocation of management resources.</li> </ul>		
<b>Regional IT Solutions</b>	<ul style="list-style-type: none"> <li>Demand for IT investment continues in municipalities due to system standardization, etc.</li> <li>IT investment is expected to strengthen, especially among megabanks. Regional banks are facing increasingly severe business conditions and are closely watching IT investments associated with regional oligopolistic restructuring.</li> <li>Life and non-life insurance companies benefited from the elimination of cross-shareholdings, etc. and IT utilization expanded, with the aim of adopting cloud computing, utilizing AI, and expanding services.</li> <li>In medical services, progress has been made in establishing and integrating data bases and using ICT. Needs for IT investment, including medical safety measures, continue to increase.</li> </ul>		

© 2025 TIS Inc.

These trends may differ from general industry trends since management's assumptions also take into consideration the status of IT investment by TIS INTEC group clients.

19

I would like to continue by explaining our full-year forecast for the fiscal year ending March 31, 2026.

First, on page 19, is the perception of the business environment. While we need to keep a close watch on changes in the environment, we remain of the view that the long-term expansion trend of IT investment will continue. We expect the business environment to remain favorable in each segment.

## Fiscal 2026: Performance Forecasts

- Expect higher sales and higher operating income, reflecting business expansion and progress on measures to improve productivity.
- Net income is expected to decrease mainly due to a reduction in extraordinary income and expenses (net).

[Millions of yen]	Fiscal 2025 actual	Fiscal 2026 estimate	YOY change	
Net Sales	571,687	<b>582,000</b>	+10,312	[+1.8%]
Operating Income	69,047	<b>73,000</b>	+3,952	[+5.7%]
Operating Margin	12.1%	<b>12.5%</b>	+0.4P	-
Net Income Attributable to Owners of the Parent Company	50,012	<b>49,000</b>	-1,012	[-2.0%]
Net Income to Net Sales Ratio	8.7%	<b>8.4%</b>	-0.3P	-
Net Income per Share [Yen]	215.00	<b>216.86</b>	+1.86	[+0.9%]
ROE	15.3%	<b>14.5%</b>	-0.8P	-

\* ROE estimate for fiscal 2026 is a calculated value.

© 2025 TIS Inc.

20

Please refer to page 20. This is the full-year forecast for the fiscal year ended March 31, 2025.

We plan a 1.8% YoY increase in net sales to JPY582 billion and a 5.7% YoY increase in operating income to JPY73 billion, with both sales and operating income rising. Net income is planned to decrease mainly due to a contraction of net extraordinary gains/losses. ROE is also expected to decline due to this and other factors, but we have begun to take measures to achieve the goals of the medium-term management plan, which will be explained later.

## Fiscal 2026:

### Analysis of Changes in Operating Income by Factors (Forecast)

- Despite ongoing growth investment, including investment in human resources, operating income is expected to increase, reflecting efforts to provide high-value-added businesses and promote measures to improve productivity.

© 2025 TIS Inc.

21

Under the basic policy of the medium-term management plan, frontier development, we will steadily accumulate project acquisition orders, while firmly advancing the system that supports the foundation for business expansion, to further ensure the achievement of the plan. The target for unprofitable projects remains unchanged at JPY1 billion or less for the full-year.

We will work as a unified group to curb unprofitable projects by steadily working to permeate and establish the measures we have taken to date, such as strengthening PM and risk management systems.

## Fiscal 2026:

### Sales and Income by Key Business Segments (Forecast)

[Millions of yen]		Fiscal 2025 Actual	Fiscal 2026 Forecast	YOY change		Overview
Offering Service Business	Net Sales	145,515	150,000	+4,484	[+3.1%]	Sales and operating income are expected to increase by capturing strong demand, particularly for payment, enterprise, and platform-related services. We aim to improve profitability in overseas operations through structural transformation and other initiatives.
	Operating Income	9,937	10,600	+662	[+6.7%]	
	Operating Margin	6.8%	7.1%	+0.3P	-	
Business Process Management	Net Sales	42,646	44,000	+1,353	[+3.2%]	Sales and operating income are expected to increase, mainly driven by growth in the DX Business and BPM Business, which are positioned as focus areas.
	Operating Income	5,326	6,050	+723	[+13.6%]	
	Operating Margin	12.5%	13.8%	+1.3P	-	
Financial IT Business	Net Sales	100,252	98,500	-1,752	[-1.7%]	The impact of the peak-out of large-scale development projects is expected to continue. Although a recovery in new client acquisition through modernization is anticipated, sales and income are projected to decline due to the completion of certain operation services.
	Operating Income	12,321	11,850	-471	[-3.8%]	
	Operating Margin	12.3%	12.0%	-0.3P	-	
Industrial IT Business	Net Sales	128,120	131,000	+2,879	[+2.2%]	Sales and operating income are expected to increase, supported by successful demand cultivation among existing clients—particularly in the manufacturing and service sectors—and by capturing ERP-related IT investment demand.
	Operating Income	19,330	21,200	+1,869	[+9.7%]	
	Operating Margin	15.1%	16.2%	+1.1P	-	
Regional IT Solutions	Net Sales	177,425	181,500	+4,074	[+2.3%]	Sales and operating income are expected to increase, despite a reactionary decline in industrial sales projects, by capturing steady IT investment demand in healthcare and network-related services.
	Operating Income	21,576	22,950	+1,373	[+6.4%]	
	Operating Margin	12.2%	12.6%	+0.4P	-

Second half forecast = Full-year forecast - First half forecast

52

Page 22 is a description of the forecast by segment. In financial IT, we are planning for lower sales and profits due to the lingering impact of the peak-out of large-scale projects and the termination of some operations. As introduced on page 52, we are planning for a recovery in H2, with both revenue and profit expected to increase.

Other segments plan to increase sales and profits even as they strive to expand their businesses by taking appropriate actions on IT investments and promoting service offerings, while continuing to make investments in human resources and other growth areas.

## Status/Targets for Return to Shareholders

- In fiscal 2025, the company increased its year-end dividend by ¥2 per share, bringing the annual dividend to ¥70. Increased dividends for 13 consecutive years.
- In fiscal 2026, in line with the basic policy on shareholder returns, we plan to pay an annual dividend of ¥76 per share, an increase of ¥6 from the previous fiscal year, and to repurchase treasury stock worth ¥7 billion. In addition, we plan to repurchase an additional ¥35 billion of treasury stock to optimize our capital structure, bringing the total to ¥42 billion.

25

As the last part of my explanation, I would like to explain about shareholder returns.

Please skip to page 24, which is a restatement of the basic policy, and turn to page 25.

In response to business growth exceeding the plan for the fiscal year ended March 31, 2025, we have increased the year-end dividend per share by JPY2 from the plan to JPY70, with an eye on a total return ratio of 50% level. For the fiscal year ending March 31, 2026, we plan to pay an annual dividend of JPY76 per share, up JPY6 from the previous year, and also plan to repurchase JPY7 billion worth of treasury stock.

In addition, the Company has decided to repurchase JPY35 billion worth of its own shares for the purpose of optimizing its capital structure, for a total of JPY42 billion.

We believe that this will better ensure the achievement of our ROE target of 16% or more in the final year of our medium-term management plan. While continuing to base shareholder returns on our basic policy, we will continue to consider financial strategies that contribute to the enhancement of corporate value, such as improving capital efficiency.

This concludes my explanation.

**Moderator:** Thank you very much. Next, Okamoto will explain the progress of the medium-term management plan. Thank you for your cooperation.

**Okamoto:** This is Okamoto of TIS. I would like to explain the progress of our medium-term management plan.

## Efforts for Sustainable Corporate Value Improvement

### (1) Basic Policy

- We will create social and economic value through management hinging on OUR PHILOSOPHY, contribute to a sustainable society and realize sustainable improvement in corporate value.

<Overall Picture of Sustainability Management Targeted by TIS INTEC Group>

© 2025 TIS Inc.

27

First, before I begin explaining the progress of our medium-term management plan, I would like to briefly touch on our efforts to sustainably enhance the corporate value of our group, which is the premise of the plan.

First of all, our basic policy is to contribute to a sustainable society and continuously enhance our corporate value by improving value exchange with our stakeholders through sustainability management based on our group's basic philosophy, OUR PHILOSOPHY.

As a roadmap to achieve this goal, we have established a long-term management policy, Group Vision 2032, and will promote specific strategic measures in our medium-term management plan based on this policy.

## Efforts for Sustainable Corporate Value Improvement

### (2) Analysis and Evaluation of Current Status

- Promoted measures from both business and financial perspectives. Sustainably generate returns above the cost of capital and, accordingly, improve market assessments.
- However, in order for our corporate value to be fairly reflected in market valuation, we recognize that increasing growth expectations from a medium- to long-term perspective is particularly important.

© 2025 TIS Inc.

\* CAPM estimate

28

Page 28 is an analysis and evaluation of the initiatives to date.

We believe that we have steadily improved our corporate value by promoting measures from both business and financial perspectives, and that the market's evaluation of our business has increased accordingly.

However, in view of the level of PER and other factors, we recognize that it is particularly important to raise growth expectations from a medium- to long-term perspective in order to ensure that our corporate value is appropriately reflected in market value.

## Efforts for Sustainable Corporate Value Improvement

### (3) Overview of Plans and Efforts

- Aim to achieve further increase in corporate value through execution of Medium-Term Management Plan (2024-2026).

#### Overview of Corporate Value Improvement Targets under Medium-Term Management Plan (2024-2026) and Key Points of Initiatives

© 2025 TIS Inc.

29

On page 29, we reiterate the overall picture and main points of our efforts to promote initiatives for sustainable enhancement of corporate value.

We intend to emphasize PBR as an indicator of corporate value. We will continue to strive to realize an increase in corporate value and to have it properly evaluated in the market.

## Medium-Term Management Plan (2024-2026) Overview

Basic Policy	Frontiers 2026				
	We will set <b>frontier development</b> as a fundamental strategy and strive for <b>sustainable growth paralleling higher added value</b> . We will strive to achieve <b>changes in society and for corporate clients</b> by <b>enhancing quality across all value chains</b> , starting with <b>forward-looking market development</b> and <b>business domain expansion</b> .				
Key performance indicators	Human resources growth and added value cycle	Improved earning power	Asset (=intellectual property) value creation	Winning confidence of society	Meaningful growth
	Operating income per person <b>More than ¥3.5 million</b>	Operating margin <b>13.1%</b> Adjusted operating margin 13.4% <sup>*1</sup>	ROIC/ROE <b>Above 13%/above16%</b>	Sales <b>¥620 billion</b>	EPS CAGR <b>Above 10%</b>
Priority strategies	Market Strategies				
	<ul style="list-style-type: none"> <li>Concentrate investment of management resources into defined growth areas, based on social issues and in-house strengths</li> <li>Balancing efforts to increase added value of services and reinforce technology investment, expand business with sense of speed, especially in ASEAN region</li> </ul>				
	Service Strategies	Technology Strategies	Intellectual Property Strategies	Human Resources Strategies	
	<ul style="list-style-type: none"> <li>All services, from upstream to business process outsourcing, will benefit under full value chain status</li> <li>Enrich pure services<sup>*3</sup>, focusing on four social issues<sup>*2</sup></li> </ul>	<ul style="list-style-type: none"> <li>Leverage knowledge distribution, IT architect development and redeployment structure</li> <li>Promote process redevelopment using AI x automation</li> </ul>	<ul style="list-style-type: none"> <li>Seek balance between higher added value and expanded business scale, with greater accumulation and utilization of intellectual property</li> <li>Accelerate intellectual property creation through internal use of information on points of client contact</li> </ul>	<ul style="list-style-type: none"> <li>Bolster issue resolution capabilities by increasing number consultants to create 700-person structure and by standardizing basic consulting skills</li> <li>Secure and develop top talent and establish structure for flexible redeployment of human resources</li> </ul>	

<sup>\*1</sup> Adjusted operating income margin: Calculated by adding goodwill amortization cost back to operating income.

<sup>\*2</sup> Financial inclusion, urban concentration/rural decline, low-carbon/decarbonization, and health concerns. These issues were determined by backcasting from what the world might be like in 2050 and selected on the basis of TIS INTEC Group's ability to contribute to issue resolution.

<sup>\*3</sup> Type of services essentially offered under uniform specifications applicable to all clients.

© 2025 TIS Inc.

30

The key to this is our medium-term management plan, and we intend to implement each of the measures and strategies carefully.

Progress on Key performance indicators

Overall, results were generally on track with estimates. Efforts are also underway to improve indicators that address issues.

I would like to explain the progress of the medium-term management plan from this page.

Page 31 shows the progress of key management indicators.

At the end of the first year, we assess that overall, progress is generally being made according to plan. We have already begun to take measures to achieve the targets for the indicators that have issues, and we will continue to monitor them regularly and revise or add measures as necessary to achieve the targets.

© 2025 TIS Inc.

32

On page 32 is a summary of the first year of the medium-term management plan, the fiscal year ended March 31, 2025.

In the first year of the project, we were able to generate a certain level of results by promoting the five basic strategies and capturing a wide range of strong demand. We believe that initiatives such as legacy modernization, the end of SAP ERP support, and the standardization of municipal systems have served as catalysts for acquiring new clients and deepening engagement with existing ones, thereby strengthening the foundation for sustainable growth going forward.

Here I would like to explain the two strategies we are evaluating as triangular. As for our service strategy, having a robust lineup of solutions for clients' core operations is key. While we have been steadily expanding our offerings, such as Xenlon, payment solutions, and ERP, the growth in orders has not yet reached a level I find satisfactory, so we have rated this area as a triangle.

In addition, with regard to our technology strategy, we have been working to improve internal productivity through the use of AI, and we have made some progress, with some of our efforts being featured as advanced case studies.

On the other hand, we are also triangulating this because we believe that the full-scale creation of high-value-added business results using generative AI will not be complete until the future.

We believe that it is necessary to strengthen the quality of our efforts in each of our policies, with a focus on strategies that have issues to be addressed in order to accurately respond to such changes in the future.

## Toward Medium-Term Management Plan (2024-2026) Targets

### Key themes

Operating Income Forecast (Billions of yen)

© 2025 TIS Inc.

33

Page 33 outlines the key points and priority themes for achieving the targets set out in our medium-term management plan as we enter the second year. Given the changes in the external environment to date, we believe that the most important issue for our group is value-added growth.

We are aware that we will need to make further progress toward achieving the operating income target of JPY81 billion in the medium-term management plan, starting with the results for the fiscal year ended March 31, 2025.

To achieve this, we will accelerate market development from both the industry and functional axes, and strengthen efforts to support this development. This will be a key theme.

Specifically, we will continue to cultivate new customers and establish a firm foothold in the industry with Xenlon and ERP implementation as the starting points.

At the same time, on the functional axis, we will enhance our lineup of solutions for our clients' core business operations, including the settlement area, in order to improve our value proposition.

In addition, as a prerequisite for achieving this growth, we will continue our aggressive efforts to curb unprofitable projects, restructure our business processes using AI, and acquire and train competitive human resources.

## Medium-Term Management Plan (2024-2026) Basic Policies

© 2025 TIS Inc.

## Fiscal 2026 Group Management Policy

**Sustainable growth in value provided to society and corporate value through sustainability management**

- Accelerate efforts to continuously increase corporate value by strengthening management with consideration for capital cost and stock price
- Achieve sustainable growth by enhancing risk management and optimizing priority strategy monitoring, aiming for [presence essential to social transformation]

**Increased added value by strengthening problem-solving capabilities**

- Further strengthen measures to expand consultants, IT architects, and highly skilled sales personnel, in order to enhance problem-solving, insight, and integration capabilities and increase provided value
- Enhance service portfolio management to maximize added value through service deployment on industry and function axes

**Increased profitability due to changes in business structure, etc. through continued active investment**

- Strengthen efforts to cultivate new clients and cultivate existing clients toward becoming an SPB
- Promote thorough initiatives to curb unprofitable projects
- Create results by establishing use of generated AI in direct and indirect operations

**Business expansion and establishment of governance aimed at becoming ASEAN top-class IT corporate alliance**

- Targeting Asia, which has enormous market potential, as a long-term target, strengthen relationships with investees to expand business in ASEAN countries and continuously promote joint business development
- Promotion of more sophisticated global governance management

**Maximize provision of added value by strengthening human resources growth and use of intellectual property**

- By actively investing in human resources based on the human capital scenario and responding to human resource issues, highly skilled personnel with expertise will provide high added value
- Promote further accumulation and utilization of intellectual property, such as by creating intellectual property by strengthening feedback on points of contact with clients

34

Page 34 presents the Group management policy for the fiscal year ending March 2026.

There will be no major theme changes. We believe that we will further evolve each of these initiatives to achieve the goals of the medium-term management plan.

## Activities under Medium-Term Management Plan (Topics):

### Service Strategies - Payment Business

- The cashless market remained steady. In the B2C market, mobile payments are gaining momentum, while in the B2B market, there are great expectations for revitalization not only in major companies but also in the SME market. We will continue to strive to evolve PAYCIERGE by securing share in existing areas, especially processing services, and establishing ourselves as a business operator in new areas.

#### Fiscal 2025: Key Initiatives

- Credit**
- Focus on development of light-version credit card processing service
  - April 2024: Entered into a capital and business alliance with Nudge
  - February 2025: Develop [startup suite] to provide comprehensive support from business start-up through to business development
- Digital account**
- Strengthen initiatives in B2B market - B2B transactions DX -
  - April 2025: Announced new services for Hiroshima Bank, Nihon ICS, and SMEs (launch scheduled for June 2025)
  - Strengthen platform services to enhance innovative services and responsiveness to clients
  - September 2024: Launched digital platform offering service
- Next-generation payments**
- Considering commercialization of stable coins (digital currency)
  - Started joint study with SMBC Group toward commercialization of stable coins
- Creating New Value**
- Accelerate consideration of commercialization of themes in sports and insurance domains

#### Fiscal 2026: Key themes

##### Secure share in emerging platform market [Strengthen Processing]

- Develop credit functions for digital account clients Expand orders in the credit domain, especially for light versions.
- Expansion of [B2B transaction DX] initiatives for other regional banks and commercial launch of stable coin-related services
- Improve profitability through delivery, structural optimization, etc.

##### Solving Social Issues and Creating New Value [Evolving Beyond Payment]

- Accelerate joint study with business partners on commercialization in areas with high affinity for payments

© 2025 TIS Inc.

#### Payment Business: Business Size (Sales)

35

Starting on page 35, I would like to introduce the progress of each of the initiatives in the medium-term management plan.

## Support

Japan 050.5212.7790  
Tollfree 0120.966.744

Email Support support@scriptsasia.com

The first is the payment business. The cashless market continues to expand steadily. In the BtoC domain, the use of mobile payment systems is spreading rapidly, and in the BtoB domain, in addition to large companies, there are high expectations for the revitalization of the market for small and medium-sized enterprises.

In light of these market trends, the Group will work to create value in new areas that have a high affinity with payment services, while firmly securing market share in existing areas centered on processing services.

We hope you will continue to look forward to PAYCIERGE as we continue to add features, evolve functions, and maximize the value we provide.

## Activities under Medium-Term Management Plan (Topics): Market Strategies - Modernization Business

- Continue to further evolve strengths to meet steady demand for modernization services. Pipeline business expanded and progress steadily toward target.

### Fiscal 2025: Key Initiatives

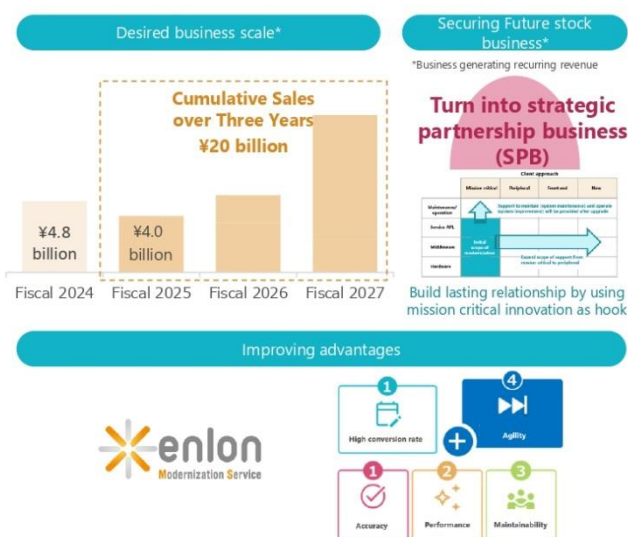

- Assigned **specialized modernization organizations** for financial IT and industrial IT services respectively.
- Collaborated with JFE Steel to expand support functions **for promotion from an operational perspective** to meet previous system approach (XMS), and promote joint sales and promotional activities.
- Entered into a partnership agreement with Pega to achieve **integrated modernization from the front end to the back end**.
- Enhance services and functions to **improve added value**: Expand rewrite area, start using tools to improve efficiency and generate AI to **improve productivity**.

⇒ Acquired orders from new clients in financial sector (April 2025)

### Fiscal 2026: Key themes

- Jointly promote projects with group companies.
- Construct continuous relationships by surrounding maintenance and development activities and acquiring projects for peripheral systems.
- [Agility] Continue upfront investment to secure.
- Expand modernization business to front areas

© 2025 TIS Inc.

Page 36 is the modernization project in the market strategy.

Our migration tool, Xenlon, has an extremely high conversion rate of almost 100%, and in addition, it has such strengths as accuracy, performance, and maintainability, and we have absolute confidence in the superiority of the tool itself.

Given our extensive track record in large-scale migration projects, we continue to receive a steady stream of inquiries from clients who operate mission-critical systems where failure is not an option.

In order to respond to such demand, we have established a system and have been actively promoting proposal activities during the past year. As a result, we were able to win a very large and large-scale order from a new financial client this past April.

As for me personally, I feel confident that the recent orders have given us solid momentum to steadily advance modernization initiatives and offset the peak-out in financial IT.

We will continue to support our clients' business growth and corporate transformation as a strategic partner through our modernization business. We would also like to expand our strategic partnership business, which is one of our strategic domains. We are now moving forward with this response.

## Activities under Medium-Term Management Plan (Topics): Market Strategies - Global Business

- Establish [ASEAN IT Federation of Top Class] by enhancing global partners and pursuing investment strategy, and aim to expand competitiveness globally and achieve consolidated net sales of ¥100 billion in FY2026.

### Fiscal 2025: Key Initiatives

### Fiscal 2026: Key themes

<b>Value-Up on Channel</b>	Selection and concentration of businesses/shift to consulting and high-value-added services
<b>Expansion of Value Chain</b>	Cross-border services and business development utilizing NTQ's business platform
<b>Diversification of investment targets</b>	Global sourcing centered on bases in North America and Singapore + Promote investment locally in each country
<b>Acquire and develop human resources to create new businesses</b>	Acquire young entrepreneurial human resources through alliances with top-class universities in Asia

© 2025 TIS Inc.

### Global business scale

37

Page 37 is about global business.

In the fiscal year ended March 31, 2025, we have steadily expanded the scale of our business by encouraging the expansion of our global partners.

On the other hand, we recognize that improving profitability is an issue. Therefore, we recognize that we must work to add value to our global services as a whole by promoting the transformation of our business structure and encouraging collaboration among the companies in which we have invested.

We will continue to promote our efforts toward the formation of a top-class ASEAN IT consortium through further expansion of our global partners and strategic investments.

## Activities under Medium-Term Management Plan (Topics): Technology Strategies - Using Generative AI

- The demand for AI consulting services has expanded, with inquiries increasing due to the enhanced functionality through integration into company services.
- Promote the development and internal rollout of an environment where each employee can use generative AI in daily tasks and achieve high productivity.

38

This page 38 is the technology strategy.

We are working on a wide range of AI generation, both for our customers and for our own internal operations.

First of all, in terms of business for our customers, demand for AI consulting services is expanding. We are also incorporating AI into the various services we provide in order to enhance their functions, and as a result, we are receiving an increasing number of inquiries.

Meanwhile, internally and internally, under the theme of business productivity innovation, we are actively developing the environment and deploying internally so that each and every employee can utilize generative AI in their daily work to achieve higher productivity.

We are already making progress in utilizing generative AI in many projects, and we are actively considering initiatives to fundamentally review the system development process to dramatically improve productivity in the future.

We also have cases that have been recognized as leading-edge initiatives. We would like to proceed with a positive and solid investment.

## Activities under Medium-Term Management Plan (Topics): Intellectual Property Strategies

- Consolidating solution knowledge as intellectual property to support value creation for new clients. Using generative AI to accelerate knowledge extraction and decision-making.
- Future plans include linking with HR data and auto-generating draft proposals to enhance value delivery.

39

Next, we will continue with the IP strategy.

In order to realize frontier development, which is the basic policy of our medium-term management plan, we believe it is essential to strengthen our sales and problem-solving capabilities, in particular. To this end, we are currently working to create an environment in which we can make more accurate and timely proposals by digitizing our customer contact points and linking them with our accumulated problem-solving know-how and performance information.

These efforts will be steady, but we believe that steady progress will lead to a foundation that will support sustainable growth, and we are determined to make these efforts strong.

## Activities under Medium-Term Management Plan (Topics): Human Resources Strategies

### Reference/Human Capital Scenario

© 2025 TIS Inc.

41

Pages 40 and 41 are human resources strategies.

Naturally, we consider human resources to be our most important management capital. We are committed to continuously strengthening our human capital.

As we continue to refine our human capital scenario to support mid- to long-term growth, our group defines top talent as consultants who identify and address client issues, highly skilled sales professionals, and IT architects proficient in advanced technologies.

### Support

Japan 050.5212.7790  
Tollfree 0120.966.744

Email Support support@scriptsasia.com

We would like to develop an environment that includes investment in human resources so that we can provide high added value through focused training and expansion of such human resources.

In addition, in order to increase the effectiveness of these efforts, it is our belief that it is important to promote human resource strategies not in isolation, but in an integrated manner with management strategies. For this reason, we have changed the structure so that Kawamura, Division Manager of the Planning Division, will concurrently serve as General Manager of the Human Resources Division starting this April.

## Activities under Medium-Term Management Plan (Topics): Financial Investment Strategies Cash Allocation

- Optimizing capital structure and maintaining financial soundness, we decided on an additional ¥35 billion share repurchase.
- We will continue active investment in M&A and strategic partnerships, maintaining the ¥100 billion growth investment framework. Cash allocation will remain flexible, leveraging cash on hand as needed.

Progress	Medium-Term Plan: Updated Three-Year Cumulative Outlook		Progress	
	Cash in	Cash out		Fiscal 2025 actual    Fiscal 2026 estimate
<b>Steady Progress Toward Medium-Term Plan Targets</b> <ul style="list-style-type: none"> <li>Operating Income Fiscal 2025 ¥69.0 billion Fiscal 2026 ¥73.0 billion Fiscal 2027 ¥81.0 billion</li> <li>Operating income per person Fiscal 2025 ¥3.1 million</li> <li>Ratio of Strategic Domains Fiscal 2025 51%</li> </ul>	Cash Generation from Business Operations	Growth investment ¥100 billion	M&A Investment ¥70 billion	¥8.2 billion    Not yet determined (Active consideration)
			HR R&D SW	¥11.3 billion    ¥11 billion
		Capital Expenditures ¥65 billion		¥20.2 billion    ¥20 billion
		Dividends and share buyback ¥110 billion (+¥35 billion compared to initial estimate)		¥22.7 billion    ¥59 billion
<ul style="list-style-type: none"> <li>Reduction in strategic shareholdings</li> </ul>	Asset Optimization /Financing Use of Cash on Hand			

© 2025 TIS Inc.

42

Page 42 is about the financial strategy.

As explained in the section on shareholder return, we have decided to repurchase JPY350 worth of treasury stock to optimize our capital structure in addition to the JPY7 billion worth for the purpose of shareholder return. Although we have revised some of our cash allocation accordingly, we will continue to make the JPY100 billion investments for growth that we have been talking about for some time, without changing our initial assumptions.

## Activities under Medium-Term Management Plan (Topics): Enhancing Management Capabilities

- In fiscal 2025, the company focused particularly on initiatives in human capital, the environment, and the supply chain.
- Focus on measures to further deepen sustainability management in light of changes in the business environment.

### Fiscal 2025: Key Initiatives

<b>Contribution to decarbonisation society and recycling-oriented society</b> <ul style="list-style-type: none"> <li>• Early switch to renewable energy-derived electricity at data centers and offices → Steady Progress Toward Achieving Medium-Term GHG Emissions Targets (Scope 1+2)</li> <li>• Conducted risk analysis on natural capital using the TNFD framework → No targets set due to limited impact on natural capital; risk analysis ongoing.</li> </ul>	<b>Providing value to society through strengthening human capital and supply chains</b> <ul style="list-style-type: none"> <li>• Focus on securing high-impact talent to lead frontier development based on the human capital investment framework</li> <li>• Promoting Co-Creation with Supply Chains Promote initiatives <ul style="list-style-type: none"> <li>✓ Update multi-stakeholder policy</li> <li>✓ Renewal of Declaration of Establishment of Partnerships</li> <li>✓ Preparation of procurement guidelines</li> </ul> </li> </ul>	<b>Continuously enhancing corporate governance to build trust with society</b> <ul style="list-style-type: none"> <li>• Revised to executive compensation system designed to maximize corporate value <ul style="list-style-type: none"> <li>✓ Increase ratio of variable compensation (performance-linked)</li> <li>✓ Review to competitive compensation level</li> <li>✓ Changed assessment method to respond to shareholder trust</li> </ul> </li> <li>• Enhancing Board Diversity and Monitoring Functions <ul style="list-style-type: none"> <li>✓ Developing an agenda for discussing and enriching the basic management policy</li> <li>✓ Clarifying the roles and codes of conduct of directors</li> </ul> </li> </ul> → Fostering a shared understanding among directors to enhance the Board's effectiveness
--	--	--

### Fiscal 2026: Key themes

- Strengthen integrated systems for managing risks and opportunities in response to the rapidly changing business environment
- Improved quality of dialogue with stakeholders, starting with enhanced disclosure (preparations for future responses to sustainability information disclosure based on SSBJ standards, etc.)

© 2025 TIS Inc.

43

Page 43 outlines our initiatives for enhancing management sophistication.

Basically, we will continue our efforts based on a long-term perspective, but in light of changes in the business environment, we will focus on promoting measures for further evolution of sustainability management.

## Activities under Medium-Term Management Plan (Topics): Non-Financial Management Indicators

- While progress in increasing the number of consultants remains a challenge, other metrics are tracking well. We will further strengthen our focus on expanding human capital.

Materiality themes	Perspective/policy on measuring progress	Indicators	Scope*1	Fiscal 2024 Results	Fiscal 2025 Results	Fiscal 2027 Targets
1 Create a society in which diverse human resources are engaged and thrive	<b>Demonstrate capabilities of employees</b> Human resources with specialized expertise will be at forefront of frontier development and provide high added Value	Job satisfaction	B	52%	56%	58%
		Number of consultants	B	510 persons	545 persons	700 persons
		Number of female employees in management positions	B	12%	13%	15%
2 Create a society in which diverse human resources are engaged and thrive	<b>Provide value to society</b> Aim to integrate business and sustainability so that promoting business aligned to strategic domains itself creates social value	Strategic domain ratio	A	48%	51%	52%
		Operating income per person	A	¥2.9 million	¥3.1 million	Over ¥3.5 million
		Growth investment	A	Three-year total ¥72.0 billion	Annual ¥19.5 billion	Three-year total ¥100.0 billion
3 Create a safe society through highquality services	<b>Quality demanded by society</b> Realize management attitude/practices supporting accumulation/distribution of intellectual property, and create appealing quality	Client/service satisfaction	C	54%	59%	59%
		Business partner satisfaction	D	77%	74%	81%
4 Enhance corporate governance and earn the trust of society	<b>Company chosen by society</b> Constantly reinforce internal controls on groupwide basis, and contribute to decarbonized society and recycling-oriented society	GHG emissions (Scope 1+2)*2 [Compared with fiscal 2020]	A	60% reduction	65% reduction (preliminary)	70% reduction
		Renewable energy utilization rate*2 (Offices and data centers)	B	Introduced 57%	Introduced at 62% (preliminary)	Fiscal 2031: 100% introduction

© 2025 TIS Inc.

## Activities under Medium-Term Management Plan (Topics): Efforts to Curb Unprofitable Projects and Improve Quality

- Continuously strengthen preventive and discovery measures from all perspectives, including strengthening the Group-wide quality management system to prevent unprofitable projects and reviewing processes for early detection of unprofitable projects to minimize losses.

© 2025 TIS Inc.

45

On page 45, I would like to discuss one of the major challenges we have faced in recent years, namely, efforts to curb unprofitable projects and improve quality.

We are continuing to strengthen our quality control system and other measures throughout the Group with the aim of preventing unprofitable projects from becoming large-scale projects by detecting and dealing with them as early as possible. The system or framework itself is not significantly flawed. Ultimately, it all comes down to each individual on the front lines. While it may take time for some initiatives to be fully understood, internalized, and established at the field level, we will continue steady awareness-building efforts and thorough implementation. Through these actions, even as we pursue business expansion, including proactive acquisition of new clients, we remain committed to minimizing the impact on performance.

## Activities under Medium-Term Management Plan (Topics): Brand Strategies

- Aim to be the corporate group of choice for all stakeholders and continue to focus on enhancing brand value.
- Through sponsorships at the Osaka-Kansai Exposition and B.LEAGUE, we will deepen ties with local communities and strive to be a company that grows together with society.

### Osaka-Kansai Expo (EXPO2025)

TIS supports the Osaka-Kansai Expo and serves as a Super Premium Partner of the Osaka Healthcare Pavilion. As a sponsor, TIS provides the healthcare platform and official apps that support the pavilion, contributing to a vibrant vision for the future of healthcare.

➤ For more information (in Japanese), please visit  
<https://www.tis.co.jp/company/sponsorship/expo2025/>

© 2025 TIS Inc.

### B.LEAGUE(2024-25)

TIS supports Japan's professional men's basketball league, B.LEAGUE, as a Supporting Company. To help increase attendance, we contributed to the development of marketing strategies based on user research. Currently, measures based on these strategies are being implemented. Moving forward, we will continue to work alongside B.LEAGUE to make basketball even more exciting and emotionally engaging as a form of entertainment.

➤ For more information (in Japanese), please visit  
<https://www.tis.co.jp/company/sponsorship/bleague2024/>

46

This is our brand strategy, and we are introducing our sponsorship of the Osaka-Kansai Expo and the B-League basketball tournament.

Our group aims to be a company that deepens its ties with the community and grows together with society, and we consider these activities to be extremely important as part of this effort. We hope to use these initiatives as a starting point to create new business opportunities and solve social issues.

## Seeking Further Improvement in Corporate Value

47

This is the last part of my explanation, page 47.

One year has passed since the start of the medium-term management plan. As mentioned previously, the fiscal year ended March 2025 has been a challenging one, as we faced a significant impact from the peak-out of large-scale financial development projects that had driven business growth in recent years. Even so, we exceeded our performance targets, and new business initiatives, starting with Xenlon, are now gaining momentum. We view these outcomes as very positive results.

However, in order to achieve the high goals set forth in the medium-term management plan, we must do this by further expanding our service business and further expanding SPB, starting with modernization. And we believe that there are many themes and issues that we need to focus on for sustainable growth, such as controlling unprofitable projects and utilizing generated AI.

By continuing to carefully and steadily address each of these issues, we intend to firmly establish our footing and move forward with steps toward further growth.

Above all, however, we recognize that we have the will and the strength to make this happen. We would like to do our best even more.

Moving forward, under the core policy of our medium-term management plan, frontier development, we will continue to lead from the front as each and every employee takes a step forward in their respective roles, fulfilling their responsibilities as pioneers. Through this, we aim to strengthen our front lines and drive structural transformation, ultimately achieving sustainable growth for the Group and further enhancing our corporate value. We appreciate your continued support and look forward to delivering on these ambitions.

This is the end of my explanation.

## Question & Answer

---

**Moderator [M]:** Thank you very much. We will now have a question-and-answer session.

Please note that each person is limited to two questions at a time. Please understand that we may not be able to answer all of your questions due to the progress.

If you have a question about a particular slide, please specify the slide number as well, as the slide will be projected. We will now begin.

First of all, Mr. Tanaka of Morgan Stanley MUFG Securities, please ask your question.

**Tanaka [Q]:** My name is Tanaka from Morgan Stanley. Thank you.

The first point is the three-month order intake. For software development overall, you saw a YoY increase of 3.6%. Q3 was so good that I was expecting a little more, but when I looked at the contents, the industrial IT area was quite strong, and I wondered if regional IT could be in the plus column, but it was in the minus column. What is the content of this area, and what is the outlook for the future?

**Kawamura [A]:** I will answer. Regarding orders received in Q4, it is true that Q3 was very strong, but on the other hand, as a whole, there was a reactionary decline in the financial IT sector, as we had announced, resulting in an overall growth rate of 3.6%.

Regarding your question about industrial IT, especially ERP-related and SAP. We believe that our orders were particularly strong due to the strength of those orders and the contribution of orders from our modernization business.

With regard to regional IT, results for Q4 were very strong. This is partly because orders received in Q3 were also very good. Orders in Q4 were slightly weaker than in Q3, but overall, I think this is part of the wave of orders, so I don't think there will be a major change on an actual basis.

There has been slight recoil in demand, including in the medical sector, which continues to have a minor negative impact. However, we believe we have a solid order backlog going into FY2025, and we do not expect any significant changes in our clients' IT investment trends. Therefore, our overall direction remains unchanged, we will continue to steadily build on our progress and aim for increased revenue and profit. We hope this clarifies our position moving forward. That is all from me.

**Tanaka [Q]:** Thank you. As for the second point, while I understand that Xenlon has been performing very well, you also mentioned earlier that a large-scale order was received in the financial sector in April. Could you share more details on the size of that order and the project duration? Also, can you give us some details about the amount of orders received for development?

**Kawamura [A]:** We received the order in April, and I hope you understand that it is in the billions. The duration of the project was, I believe, two or three years. I'm not sure exactly what it is right now.

**Okamoto [A]:** I think it was two or three years.

**Tanaka [Q]:** I see. Is this mostly in development orders?

**Okamoto [A]:** Yes, in development orders.

---

### Support

Japan 050.5212.7790  
Tollfree 0120.966.744

Email Support [support@scriptsasia.com](mailto:support@scriptsasia.com)

**Tanaka [Q]:** It would be coming into finance.

**Okamoto [A]:** Yes.

**Tanaka [Q]:** I see, so when you say several billion yen, would it be reasonable to assume around JPY5 billion? Would that be roughly accurate?

**Kawamura [A]:** I hope you understand that it is around the middle of billions of yen.

**Okamoto [A]:** The duration is about three years.

**Tanaka [Q]:** Three years. Sorry, just to clarify, roughly when is the project scheduled to begin after the order has been received?

**Okamoto [A]:** We have already started.

**Tanaka [M]:** I understand. Thank you.

**Kawamura [A]:** As we spent the past year conducting various PoC activities for this project, we've been able to start smoothly.

**Tanaka [M]:** Thank you very much. That is all from me.

**Moderator [M]:** Thank you. Now, please wait a moment while I appoint the next person.

Please continue with your question, Mr. Kikuchi of SMBC Nikko Securities.

**Kikuchi [Q]:** I am Kikuchi. Thank you. I have two questions.

Regarding the fiscal year just ended, you mentioned that the impact from the decline following the large-scale financial project was successfully mitigated. Looking ahead, is it correct to understand that this is a project running through around 2030, and that the outlook now is that the volume of work won't decline as much as initially expected during the project period? Or given that orders have been declining, does that mean you will still need to secure new ones in the new fiscal year after all? That said, in terms of order volume, I believe there wasn't actually much of a decline in the fiscal year just ended, so the overall level seems to have been maintained. So should we expect the decline to begin in earnest from here on out, or is it more likely that things will stay relatively stable through around 2030, with any real drop coming around the time the project wraps up?

I imagine that if there's no actual decline, even with some recoil being absorbed, it would make it considerably easier for your company to accumulate profits and achieve the targets set in the medium-term plan. So my first question is, could you share more about the outlook for large-scale projects?

**Kawamura [A]:** Now, I will explain the figures and other aspects.

We are unable to discuss specifics about your project, so I will only answer in terms of our performance.

As for the initially anticipated impact of the peak-out in our plans, thanks to the steady progress of our projects, we were able to keep the impact lower than expected. As a result, financial IT ended up exceeding our initial plan.

Since the project is progressing smoothly, I hope you will consider that the situation is generally in line with the progress of the medium-term management plan.

---

Japan 050.5212.7790

Tollfree 0120.966.744

Email Support [support@scriptsasia.com](mailto:support@scriptsasia.com)

As explained in the plan for the fiscal year ending March 2026, while H1 is expected to be affected to some extent by recoil from the previous period, we anticipate new orders from various projects, including this one, in H2. As such, we expect financial IT overall to return to positive growth.

From this perspective, we believe that signs of a turnaround toward the final year of the medium-term management plan are finally beginning to emerge.

Not only this large-scale project, but also orders related to modernization, as mentioned earlier, are increasing, and overall, we are steadily making progress toward achieving our medium-term plan. We hope this gives you a clear understanding of our current trajectory. That is all from me.

**Kikuchi [Q]:** I understand. It seems that the project hasn't really declined much, just slightly from the peak, and it's expected to remain at a relatively stable level throughout the medium-term plan period. In that case, while it's true that the project will eventually taper off at some point, the outlook suggests that won't happen until around five years from now, when the project comes to an end. Is it safe to assume that there will not be much impact in the short term in the current or next fiscal year?

**Kawamura [A]:** From a performance standpoint, we recognize that the fiscal year just ended saw a certain degree of recoil in both revenue and profit. However, under the new plan, our approach is to absorb most of that recoil in H1 and aim to return to positive growth in H2. That is all from me.

**Kikuchi [Q]:** Thank you very much. The second point, which was explained earlier, is the share buyback.

I am wondering if you could give us some background or logic behind this rather large share buyback.

**Kawamura [A]:** Yes, thank you.

Regarding share buybacks, the financial strategy of our medium-term management plan states that we will make investments for growth, and that we will respond flexibly after carefully examining our balance sheet, including the level of net assets.

We have also set a goal of achieving ROE of 16% or more in our medium-term management plan. Taking all of these factors into consideration, and based on the balance sheet as of the fiscal year just ended, we determined that now is an appropriate time to implement a share buyback in order to optimize our capital structure. Accordingly, we have announced a share repurchase program totaling JPY42 billion. This will bring the ROE to a level above 16%.

In addition, we would like to achieve a higher level of growth through the growth of our business. That is all from me.

**Kikuchi [Q]:** Thank you very much. In the past, your company has conducted share buybacks both from the market and by purchasing cross-shareholdings, including several large-scale transactions. In this case, would it be correct to understand that the buyback is primarily focused on cross-shareholding disposals?

**Kawamura [A]:** For this time, we plan to purchase most of our products from the market. While a portion of the buyback will be conducted through ToSTNeT transactions, the majority will be carried out through market purchases. We would appreciate it if you could understand it in that way.

**Kikuchi [Q]:** So, just regular market purchases. I understand that, technically, ToSTNeT transactions are considered market purchases as well. Is it correct to say that most of the buyback will be through regular, ongoing daily purchases on the open market?

**Kawamura [A]:** Yes. The announcement is based on this, with some parts of the transaction to be conducted through ToSTNeT.

**Kikuchi [M]:** I understand. Thank you. That is all from me.

**Moderator [M]:** Thank you. Now, please wait a moment until the next person is appointed.

How about some more questions? Please send them to us.

Mr. Iwabuchi of Okasan Securities, please continue with your question.

**Iwabuchi [Q]:** Thank you. First of all, there are a few things in the area of achievements.

First, you explained a little bit about the regional IT in Q4. Can you comment on why operating income was strong in Q4 and whether it is sustainable or not?

**Kawamura [A]:** In Q4, we believe that we were able to make a very strong landing, especially in the area of life and non-life insurance, as well as in dealing with local governments.

Given that orders had already built up significantly by Q3, H2 progressed in a very favorable manner, and we were pleased to have been able to exceed our targets.

As mentioned earlier regarding order trends, we have factored in some recoil from previous sales projects. However, the overall trend remains largely unchanged. We intend to continue capturing IT investment demand across Japan, including from small and medium-sized enterprises, and aim to carry this momentum into FY2026 as well. That is all from me.

**Iwabuchi [Q]:** So would that mean that you don't have to think of any good profitable projects in Q4?

**Kawamura [A]:** Yes. The increase was not driven by any one-off factor; rather, we believe it reflects the steady progress of our initiatives to improve profitability. Additionally, the previous year included a number of unprofitable projects, and our ability to effectively contain those this year also contributed to the increase in profit.

**Iwabuchi [Q]:** Thank you very much. Next, one more thing on the results, I believe that non-consolidated results showed an increase in revenue and a decrease in operating income. Can you give us some major factors that contributed to this?

**Kawamura [A]:** In short, you mean TIS alone?

**Iwabuchi [Q]:** Yes, that's right. I believe that was reflected somewhere, perhaps on page two of the earnings release.

**Kawamura [A]:** On a non-consolidated basis, we saw a very strong increase in sales and a slight decrease in operating income.

We believe that this is due to the fact that there were some unprofitable projects on the TIS side. As mentioned earlier, among the unprofitable projects, there was one relatively large project each in industrial IT and offerings, which we believe had an impact.

In addition, as was mentioned in an earlier question, the impact from the peak-out of large-scale projects was greater compared to the previous year. Combined with other factors, this led to a slight decline in operating profit.

As we have noted, there are no significant negative factors beyond the recoil effect impacting the trend. Our focus for the fiscal year ending March 2026 will be on steadily managing profitability while driving top-line growth, and we intend to execute the plan with discipline.

That is all from me.

**Iwabuchi [Q]:** Thank you very much. Lastly, regarding your revenue forecast for this fiscal year: from what I see, your order backlog has increased by around JPY10 billion and your revenue target is also up by roughly the same amount. This gives the impression that the plan may be somewhat conservative. Are there any specific risks you have factored into this year's forecast, such as developments in the US or potential ripple effects from overseas conditions that we should be aware of?

**Kawamura [A]:** With regard to revenue, it's true that the strong finish in the previous fiscal year makes the YoY growth appear somewhat modest. However, our order backlog has continued to build steadily, and our priority is to first achieve this year's plan with certainty. From there, we aim to drive further growth and ensure the successful execution of our medium-term management plan.

We are not factoring in any particular risk in terms of sales. Of course, we need to pay attention to risk factors such as those you pointed out earlier, and we believe it is necessary to take action on a case-by-case basis, but this is not an aspect that we have incorporated into our plans to a large extent at this point.

**Iwabuchi [M]:** Okay, thank you very much. That is all from me.

**Moderator [M]:** Okay, please wait a moment until the next person is appointed. Are there any other questions? Please send them to us.

Now, since there doesn't seem to be anyone else with questions, we conclude the question-and-answer session.

Lastly, Okamoto would like to offer his greetings.

**Okamoto [M]:** Thank you very much for attending today's TIS financial results meeting for the fiscal year ended March 31, 2025. If you have any additional questions, please contact our IR representative during an individual interview or by phone, and we will be happy to answer them. We look forward to your continued interest in our company.

**Moderator [M]:** With that, we would like to close today's briefing.

Thank you very much for taking time out of your busy schedule to join us today.

[END]
