

**TIS Credit Management Solution**  
**“SCORE LINK (foreign-language Ver.)” for Thai language**  
**-- Aiming at upgrading functionalities and expanding into the Thai market**  
**via Thailand’s MFEC --**

Tokyo, Japan, July 30, 2020 – TIS Inc. (TIS) (headquarters: Tokyo, Japan), a member of the TIS INTEC Group, announced the upgrade of its “SCORE LINK (foreign-language Ver.)” credit management solution, and its introduction into the Thai market by MFEC Public Company Limited (“MFEC”), which is a capital and business alliance partner and which provides IT solutions for enterprises in Thailand.

SCORE LINK (foreign-language Ver.) is a solution that makes foreign language accounts settlement documents more efficient. (“SCORE LINK” credit management solution series)

Reading of accounts settlement documents prepared in English or Chinese via high performance OCR becomes easier through incorporation of an accounting terms dictionary. Enhanced efficiency of corporate evaluation operations involving digitization and registration of English accounts settlement documents and prevention of alteration by the saving of entry operations logs is being realized.

■ **About SCORE LINK Ver. 3.2 (foreign-language Ver.)**

SaaS and XaaS versions have been added to the lineup with SCORE LINK (foreign-language Ver.) Ver. 3.2. In addition, in an effort to enhance the reading functionality, it has become possible to digitize financial statements in multiple languages, that is, English, Chinese and Thai. For English and Thai financial statements, a function has been incorporated to automatically correct the results of digitization using a dictionary of accounting terms. With this functionality, entry errors can be prevented, making entry operation duties more efficient.

■ **Promotion to Thai market**

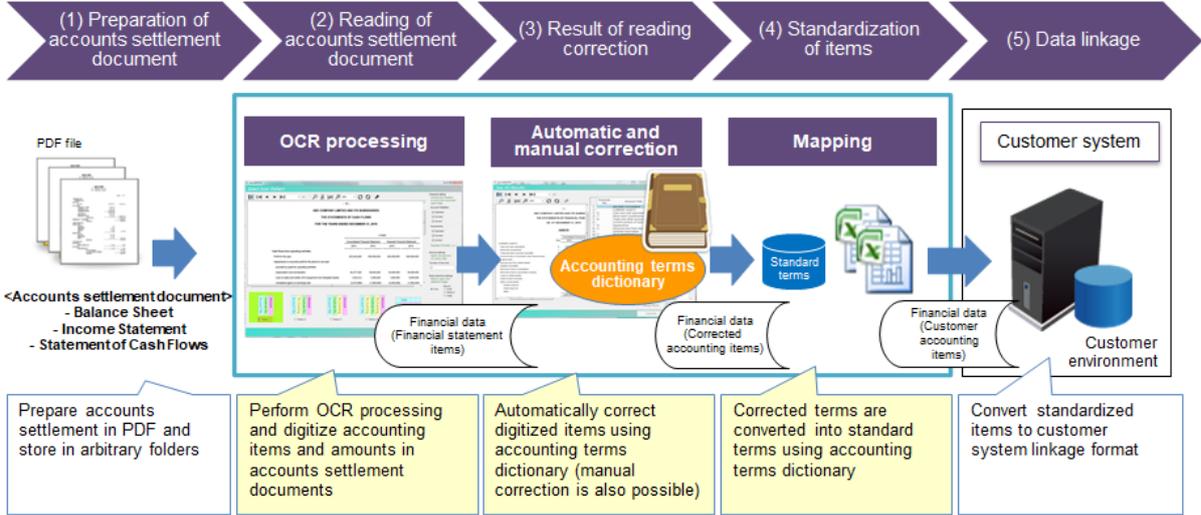

As this Thai language localization has enabled use by local staff in Thailand, introduction of this solution will focus on financial institutions in Thailand by MFEC, which is a capital and business alliance partner of TIS.

In some major banks inside Thailand, systems developed in-house have been introduced for enhanced efficiency improvements in financial statement entry operations, however, in most cases operations are still being processed manually, and there is great need for efficiency improvements. What is more, systemizing manual entry operation duties enables prevention of errors due to manual entry, and shortening of the time required from credit assessment of business partner companies, or the loans process from application to grant in financial institutions.

MFEC will be the general agent in Thailand for SCORE LINK (foreign-language Ver.), and it will conduct sales activities not only to subsidiaries of Japanese companies in Thailand but also local Thai companies, as well as providing product support in Thai language, in cooperation with TIS.

TIS will in the future as well strive to expand sales of these solutions by further enhancing functionalities and handling multiple languages, from the perspective of expansion in ASEAN areas where need for systemization is especially projected.

<Operational Flowchart of SCORE LINK (foreign-language Ver.) Ver.3.2>

■Features of SCORE LINK (foreign-language Ver.) Ver. 3.2

1) Offer operational efficiency of accounts settlement document registration by improved reading rate

With an accounting terms dictionary and correction functionality incorporated that can improve the reading rate for accounting items just after OCR reading from approx. 40% to approx. 90%, the solution enables a reduction by approx.70%, of the hours for entry of data compared to operating hours via manual entry in the past.

2) Incorporating English accounting titles based on accounting regulation and standards

This solution incorporates Japanese accounting standards know-how cultivated based on results of the introduction of SCORE LINK credit management solution to over 300 companies in Japan centering on financial institutions, such as banks, credit unions, credit guarantee associations, etc., and also English accounting terms systematized on the basis of the results of introduction and use of SCORE LINK (foreign-language Ver.) in ASEAN countries.

As a compatible language, in addition to English and Chinese, Thai has also been newly added. The Thai version is provided with an accounting terms system based on the “TFRS for NPAEs \*1” accounting standards in Thailand,

\*1 TFRS for NPAEs : Thai Financial Reporting Standards for Non-Publicly Accountable Entities

3) Reinforced security with newly-added SaaS and XaaS version

In addition to provision of the standalone version, we added SaaS and XaaS versions to the lineup. The SaaS and XaaS versions realize reinforced security by such means as prevention of unauthorized installer program copies, or mitigation of risks of data removal by terminated employees

## <Start Date of New Version>

July 30, 2020

For details of SCORE LINK (foreign-language Ver.) Ver 3.2, see the URL below.
